Tobacco kills more people than all other drugs combined. The effects of smoking cause heart attacks, lung cancer, oral cancer, memory loss, and countless other diseases. The reason for these health problems is that each cigarette is filled with more than 200 different toxins including nicotine, a drug so powerful that it's more addictive than heroin. Furthermore, second-hand smoke affects countless innocent people who end up suffering for someone else's bad addiction. For this reason, smoking is more dangerous and less excusable than other drugs.

- ① The baneful influence of tobacco
- ② Relationship between tobacco and cancer
- ③ Hazard of second-hand smoking
- ④ The toxic effects of nicotine

14. 다음 문장이 들어갈 위치로 가장 적절한 것은?

It is now clear, from the results of the first research studies of this subject, dating from the 1960s, that all of these opinions are wrong.

( A ) The first step in considering the nature of sign language is to eradicate traditional misconceptions about its structure and function. ( B ) Popular opinions about the matter are quite plain: sign language is not a real language but little more than a system of sophisticated gesturing; signs are simply pictorial representations of external reality; and because of this, there is just one sign language, which can be understood all over the world. ( C ) A clear distinction must be drawn, first of all, between sign language and gesture. To sign is to use the hands in a conscious, "verbal" manner to express the same range of meaning as would be achieved by speech. ( D )

- ① A                                      ② B
- ③ C                                      ④ D

Every year, people spend approximately 400 million dollars on detergents to clean, and help keep their laundry fresh. Most consumers of detergents are not novices, meaning that they have tried various brands of detergents and carefully selected the best product. To each customer, the best product may have a different priority. For example, some people may select the most well-known product, while others purchase according to how economical the product may be. Still, for others buying environmentally safe products is their priority.

However, many customers do not actually compare what is inside the box of various detergents. A surprising study showed that while each brand had its own marketing strategy, over 90% of the same basic ingredients were identical to all brands. Another interesting result was found when veteran detergent customers were not shown the box, and were asked to choose their favorite brand based only on the result of the detergent. Only 3% were able to identify their brand and even then, most of them were not entirely sure. This goes to show that while detergents may seem different, marketing is just giving basically the same products different clothes.

- ① How environmentally safe the products are
- ② How famous the products are
- ③ How economical the products are
- ④ What ingredients are in the products

Conserving water is typically a good thing—except when you're penalized for your frugality. Elected officials are urging people to speak out against the Water Board's potential double-digit water rate hike at a public hearing in St. Albans on Feb. 16. The rate hike is needed, the city officials have said, because people are using less water, which means less revenue.

"The only way to stop the soaking of taxpayers is by showing up and making our voices heard," City Councilman Peter Koo said. "We must remain ever watchful, informed and ready to fight."

He attended a Queens Borough Board meeting Monday where a representative from the City Department of Environmental Protection spoke in favor of the proposed rate hike.

Myths try to answer several questions. Where did the world come from? What are the gods like, and where did they come from? How did humanity originate? Why is there evil in the world? What happens to people after they die? Myths also try to account for a society's customs and rituals. Beyond giving such explanations, myths are used to justify the way a society lives. Ruling families in several ancient civilizations found justification for their power in myths that described their origin in the world of the gods or in heaven. In India the breakdown of society into castes is based on ancient mythology that emerged in the Indus Valley after 1500 B.C.

- ① Types of Myths
- ② Functions of Myths
- ③ Myths of Customs
- ④ Myths of the Gods

Zero percent interest for the next six months, or even a year, on all balance transfers. No annual fees. Reward points for everyday purchases. Choose airline tickets, hotel stays, car rentals, a variety of great brand-name products or just get cash back. What red-blooded American credit-card holder could resist such a deal? Well, if you're smart, maybe you. Tantalizing offers like these from your credit-card issuers are increasingly filled with traps that can pile on unexpected fees or trigger punitive interest, as high as 35%. These details are spelled out in the fine print of promotions and cardholder agreements. But, says Curtis Arnold of CardRatings.com, "You have to be incredibly diligent to avoid the pitfall."

- ① Lower rates and other deals sound great, until you find out what you're really paying.
- ② Credit-card companies do not always behave badly towards their customers.
- ③ Credit-card companies will be fined unless they provide the details of cardholder agreements.
- ④ Reward points or low punitive interests are being added to the existing benefits.

The biggest hurdle to cross is realizing that credit is not an extension of income. Living within your means can require a major lifestyle change. Credit, when used wisely, is a useful money-management tool, but learning when and how to use it requires dedication and diligence. However, most consumers who have successfully made the change to debt-free living say that living with one credit card and using a spending plan has created a sense of freedom that they have never known before. All the stress and negativity of living from paycheck to paycheck has vanished.

- ① It is not wise to regard credit as a part of income.
- ② For debt-free living, it is helpful to live with one credit card.
- ③ If you work with dedication and diligence, you will be able to live free from debt.
- ④ To spend money with a plan will relieve you of the stress of barely making both ends meet.

With a well-diversified production structure, German and Japanese producers are now more resilient to shocks. The ruthless cost-cutting that went along with outsourcing significant parts of their manufacturing production has enabled them to stay competitive and maintain their traditional focus on export-driven growth. This focus is not always an advantage in a modern consumer society. At the moment, however, it helps. As ever more people in ever more emerging markets are leaving abject poverty behind and are turning into consumers, the export-oriented companies of the developed world find fast-growing markets for their products.

- ① The production structure of German and Japanese producers makes it easier to adapt to shocks.
- ② Cost-cutting is the more effective strategy than outsourcing for German and Japanese producers to stay competitive.
- ③ The focus on export-driven growth is conducive to German and Japanese producers.
- ④ German and Japanese firms are able to sell more products due to the increasing number of customers.
